# PART V: MEDICAL DISPUTE RESOLUTION REVIEW SUMMARY, METHODOLOGY, AND/OR EXPLANATION

This dispute relates to services provided in an Ambulatory Surgical Center that are not covered under a fee guideline for this date of service. Accordingly, the reimbursement determined through this dispute resolution process must reflect a fair and reasonable rate as directed by Commission Rule 134.1. This case involves a factual dispute about what is a fair and reasonable reimbursement for the services provided.

After reviewing the documentation provided by both parties, it appears that neither the requestor nor the respondent provided convincing documentation that sufficiently discusses, demonstrates, and justifies that their purported amount is a fair and reasonable reimbursement (Rule 133.307). The failure to provide persuasive information that supports their proposed amounts makes rendering a decision difficult. After reviewing the services, the charges, and both parties' positions, it is determined that no other payment is due.

During the rule development process for facility guidelines, the Commission had contracted with Ingenix, a professional firm specializing in actuarial and health care information services, in order to secure data and information on reimbursement ranges for these types of services. The results of this analysis resulted in a recommended range for reimbursement for workers' compensation services provided in these facilities. In addition, we received information from both ASCs and insurance carriers in the recent rule revision process. While not controlling, we considered this information in order to find data related to commercial market payments for these services. This information provides a very good benchmark for determining the "fair and reasonable" reimbursement amount for the services in dispute.

To determine the amount due for this particular dispute, staff compared the procedures in this case to the amounts that would be within the reimbursement range recommended by the Ingenix study (from 213.3% to 290% of Medicare for this particular year). Staff considered the other information submitted by the parties and the issues related to the specific procedures performed in this dispute. Based on this review, the original reimbursement on these services is within low end of the Ingenix range. The decision for no additional reimbursement was then presented to a staff team with health care provider billing and insurance adjusting experience. This team considered the decision and discussed the facts of the individual case.
